Discover Earth's Elements

Summer Camp 2025!

Ages 3 to Kindergarten

Welcome to Camp!

Our explorers will journey through the elements - **land, air, and water** by discovering the **transportation** that moves us!

Through hands-on learning, building, and play, they'll spark curiosity and imagination in an exciting adventure.

Schedule:

- **Morning Welcome Circle** - Lesson of the Day
- **AM Playground Time** - **Splash Pad, Sandbox and STEM Building Blocks.**
- **Gardening**
- **Montessori Work Period** - Includes Weekly Craft or Project, & **Food Preparation**
- **AM Snack**
- **Daily Specials** - **Music & Movement, Yoga, Art, Cooking, & Spanish Classes**
- **Dismissal for Half Day OR Lunch**
- **Nap**
- **After-Nap Activities** - Crafts & More!

Creative Learning Adventures

Montessori & Stem-Based Curriculum

This camp offers an exciting, theme-based adventure where language, math, science, and art come to life through interactive learning and creative discovery.

3 Sessions, 3 Elements

Summer Camp 2025, our campers will journey through land, air, and water to uncover the science of transportation in a fun-filled experience.

Outdoor Play & Special Classes

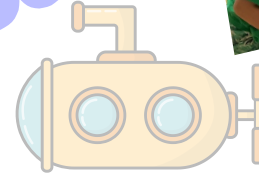

Campers thrive in our outdoor spaces for gross motor play! *Special Classes:* **Music, Movement, Yoga, Art, Cooking & Spanish!**

Session	Dates
Session 1	June 16th-July 3rd
Session 2	July 7th-July 25th
Session 3	July 28th-August 8th

Earth's Elements

Three Elements, Three Sessions!

Session 1: Water - Rafts, Sailboats, & Submarines

In Session 1, children will journey along rivers and dive into the ocean to explore how we travel across waterways. Through various experiments, they'll discover the science of water transport. Campers will build rafts, sailboats, and submarines for their own mini expeditions. With exciting trivia, creative art projects, and immersive activities, our classrooms will transform into a water wonderland!

Session 2: Land - Vehicles Above & Below

From cars and trains to bicycles and buses, land transportation keeps the world moving! Children will explore how goods and people travel, building vocabulary and sparking curiosity along the way. Through hands-on activities, they'll create and experiment with different vehicles while strengthening fine motor skills, visual memory, and concentration. Get ready for a journey of discovery on wheels!

Session 3: Air - Up, Up & Away

Kites, balloons, blimps, drones, and planes—how do they soar through the sky? Children will explore the science of flight, discovering how things lift off and stay in the air. From the Montgolfier brothers to Count von Zeppelin, they'll learn about pioneers of aviation and their sky-high adventures. Campers will build their own flying machines and see just how far they can go!

2025 Summer Camp Fees			
	Half	Full	Exended
